## EDUCATION

**Christ University**

*Bachelor of Technology in Computer Science*

**GPA:** 3.4 / 4.0

**Relevant Coursework:** Business Networking and Marketing

**Bangalore, India**

*Expected June 2027*

## WORK & LEADERSHIP EXPERIENCE

**myCollegeCanteen**

*Founder, myCollegeCanteen*

**Bangalore, India**

*July 2024 – January 2025*

Sought out and created a **canteen food ordering system** to speed up work, ease the burden on college canteen staff, and cut down on traffic during rush hour.

### Selected Project Experience:

- Oversaw a team responsible for identifying and assessing potential software for a campus cafeteria order placement system.
- Concluded that the college needs to approve and implement the new software to build a digital ordering system and improve efficiency and service quality.
- Identified key bottlenecks in the manual order handling process and recommended a digital transformation. This analysis has led the college to consider deploying the canteen food ordering app, which is expected to significantly reduce staff workload and improve service speed once implemented.

**Underground Blr**

*CoFounder, Underground Blr*

**Bangalore, India**

*June 2024 – Present*

Used networking abilities to successfully run a **party marketing company**, planning a variety of marketing strategies that boosted customer satisfaction and spurred corporate expansion.

### Selected Project Experience:

- Oversaw the preparation and promotion of themed parties, working closely with customers and providers to guarantee a smooth event schedule. Overall client satisfaction and repeat reservations increased by 25% as a result of this effort.
- The effective marketing of high-profile events resulted from the application of these ideas.
- Examined a range of venue choices, taking into account amenities, cost, and accessibility. Suggested ideal venues that led to the effective promotion and organization of high-profile events, improving the company's standing.

**Train Timing Management System**  
*Developer*

**Bangalore, India**  
*July 2024 – Present*

Designed and implemented a **Train Timing Management System** using **Oracle SQL**, optimizing train schedules, ticketing, and passenger management for improved operational efficiency.

**Selected Project Experience:**

- Developed a relational database model to manage train schedules, stations, ticketing, and passenger information, ensuring data integrity and efficient query performance.
- Created Oracle SQL-based tables with primary and foreign key constraints for structured data organization, linking passengers, tickets, trains, stations, and schedules.
- Implemented schedule tracking by designing a StopsAt relationship to manage train stop points and arrival/departure timings, reducing conflicts and improving time management.
- Enabled ticket booking automation by linking passengers with train seats, ensuring seamless reservations and database consistency.
- Optimized SQL queries for faster retrieval of train schedules and bookings, enhancing real-time data access for users.

This system successfully streamlined train timing and ticket management, showcasing the power of database-driven automation in transport operation.

**STUDENT CLUBS AND ORGANIZATION**

**Centre For Academic And Professional Support [CAPS]**  
*Head of Operations, CAPS*

**Bangalore, India**  
*July 2023 – August 2024*

- Helped students strike a balance between their professional job objectives and their academic obligations.
- Gathered more than 100 members by conducting in-depth interviews and a stringent screening procedure.
- Arranged talks and discussions on socio-economic issues.
